EDUCATION:

B.Sc Chemistry.

University of Lagos,
Akoka-Yaba, Lagos State.

Diploma, ICT & Graphics Design,

Globaltech World Computer
Institute,
Kosofe LGA, Ketu, Lagos State.

TECHNICAL SKILLS:

- Languages: **HTML, CSS, Javascript, Typescript, Java, Solidity.**
- Libraries/Frameworks: **MySQL, MongoDB, React & Next.js, React-Native, Hardhat, Spring & Spring Boot, Node.js, Bootstrap, TailwindCss**
- Databases: **MySQL, MongoDB, PostgreSql**
- Tools: **Git, GitHub, Docker, VS Code, IntelliJ IDEA, Eclipse.**
- Others: **REST APIs, Agile Methodologies, Responsive Design, Microservices.**

CAREER OBJECTIVES

Driven web & mobile developer with a strong background in problem-solving & analytical thinking from a Chemistry degree. Equipped with hands-on experience from freelance projects with specialization in building responsive, user-friendly web and mobile applications, as well as full-stack development with a proven ability to deliver client-focused solutions.

PROFESSIONAL EXPERIENCE

● **Web Developer / Sales Manager**

TOBTOP STORES, Ketu, Alapere. May 2020 - June 2022

- Developed the frontend of a minimalistic website that facilitated the growth in business by 40%.
- Oversaw the management of sales and expenditure.
- Created a reliable pattern of advertisement that doubled average sales per day.

Technologies: Html, Css, Javascript.

● **Frontend Developer Intern**

SIDEHUSTLE IT SERVICES, March 2022- July 2022

- Led my team to deliver the capstone project with explicit consciousness of time and deadline.
- Participated in weekly code reviews and feedback sessions, improving coding proficiency and gaining insights into real-world development workflows.
- Learned and applied essential tools like version control in order to get every member's hands on projects, hence improve efficiency.

Technologies: Html, Css, Javascript.

PROJECTS

● **Clip-Flicks**

A mobile application built using Spring boot and React-Native that allows users to upload clips from their favorite iconic shows and allow others to watch.

- Implemented user authentication and video storage functionality.

SOFT SKILLS

- Problem Solving
- Adaptability
- Effective Communication
- Time Management

- Created a bookmarking feature that syncs across multiple devices.
- Built a profile section to display user-specific video uploads.
- Implemented search feature for keyword specific videos.

Technologies: Spring Boot, Typescript, React-Native, MongoDB, REST APIs, Docker

[Frontend Repo](#) [Backend Repo](#)

● ShoppingList

Multi functional website that stores and helps keep track of your grocery items (top items, top categories, checkout history).

- Implemented user authentication and user history functionality for previous checkouts.
- Specially handled responsivity accross all screen sizes with tailwind.
- Built a statistics section for the top items, top categories (both represented with a status bar) and monthly summary (represented with a graphical curve).
- Implemented search feature for keyword specific items.

Technologies: Spring Boot, Typescript, Next.js, MongoDB, REST APIs, TailwindCss, Docker

[Frontend Repo](#) [Backend Repo](#)

● Nft-Marketplace

A web application built using Solidity and React where users can mint, buy, sell and trade digital assets with secure blockchain integration

- Implemented user authorization and digital wallet integration, supporting popular wallets like MetaMask for secure transactions.
- Designed and developed intuitive user interfaces for seamless browsing, purchasing and managing NFTs, enhancing user experience accross devices.
- Implemented withdraw functionality for the website owner that allows smooth withdrawal of all the accumulated purchase and minting funds.
- Optimized backend with efficient smart contracts using Solidity to manage secure and transparent transactions.

Technologies: Solidity, Javascript, Next.js, Hardhat.
